One of the burning topics in today's world is corruption. By the term 'corruption', we mean dishonest act in order to gain money, property or profit for oneself. It will not be an exaggeration to say that corruption is a cancer that affects nation's politics, economy, cultural and social development.

It is the most severe threat to the survival of strong and honest political system in our society. Corruption is also one kind of a crime and is illegal.

If I were asked to mention the main reason behind great leap backward in our social and political management, undoubtedly, I'll point to the threatening corruption. Corruption is prevailing in our society, invading the hearts of human from the youngest

to the eldest. Its bad affects increase or decreases depending on the power of a citizen to ignore it or abuse it.

There are many ways to corrupt in our society, which may be in cases like

institutions, elections, business, examinations, offices, marketing and so much more.

Corruption is a bad weapon possessed by every individual but everyone have the power to ignore it. In every part of our life, where there is weak political and social system, there will be weak and corruptive leaders.

Corruption is inco-operated with governments institutions and organisations, even to smallest organisations where governments funds are concerned. But there is also

a possibility that many organisations and managements can be taken without any corruption as far as strong and faithful leaders are concerned. Since

no one can lives indepently in our web like world, one's deed affects the neighbor and so on. One good deed brings goodness to others like a waving water. So is corruption, if one

leader or worker corrupts in the office, the salary or rewards of his colleagues were affected, this in turn affects the family budget of ones family and goes on to childrens, and even to their studies.

When we took politics as a corruptive game, in the hearts of every player corruption is their target. Not only in case of political system, but also in every other field where money plays the main rewarding role. The more the government takes certain steps to minimize poverty and inequality, the more the problem increases. Where could have all the funds gone? If it is given to the right person in the right place, will it not produce a change? If the funds were given to the right persons, every eye will see the results. Undoubtedly, if all the funds and managements gone vain, it is trapped in the palm of leader's hand who took the charge. Corruption largely affects the society invisibly but clearly. While many steps ~~as~~ have been taken for enlarging education system in our country, why we still find

to thousands and millions of children who only dream of school?

In one side, we see money floating and on the other side we see unemployment and inequality persisting. All these have been rooted by corruption.

In our society, we see many buildings being built while on the other side we see many houses being displaced.

How can one government employee suddenly build a big building during short term of working?

This is another manifestation of corruptive work.

In today's world, since there is uncertainty in economy, corruption needs to be tackled in cooperated global action. There's a need to take certain measures to soften the impact of corruption. In a real sense, every government employee are servants of the society who were employed to serve, not to corrupt. Corruption has taken a leading role in our society which leads the public to large inequality. The more greater the steps are, the more rewarding is politician's life who works to corrupt, but for faithful politicians, they serve harder.

In our society where we are proud of democracy, our deeds have gone the opposite of it. There are many political agents who were to deliver and report misconduct and corruption, many corruption cases have remain unsolved.

There can be a possibility that these agents have been sobbed by ~~their~~ the corrupted groups leading to their narrow ends. What our society needs is a strong watch-dog in our weak democracy who do not lose himself in the crowd and who knows his loyalty is much valuable than moneys floating to be corrupted. Corruption cannot be diminished or fight by more laws, it needs a strong watch-dog.

Corruption needs to be eliminated from the core of everyone's heart and every individual needs to be reminded of their defeat towards prevailing corruption - biggest enemy of our society. When every citizen learns that corruption is an enemy ~~who~~ that lessens their happiness and their life value, then ~~no~~ there will be

no anti-corruption <sup>day</sup> but only  
faithful & Loyalty day. The  
question is "Can there be a faithful  
watch-dog in our weak ~~police~~  
political system?"
